Specification Summary

Brand	Abus
Product type	Key Safe

Product Description

The ABUS 787 Big LED Dial Wall Mounting Key Garage offers a highly secure, spacious, and convenient solution for storing keys and plastic access cards. Designed with an extra-large internal capacity, this key safe can hold up to 50 keys or 30 cards, making it ideal for shared access among family members, care workers, tradespeople, or holiday let guests.

A standout feature is the integrated LED illumination for the dials, which lights up for approximately 30 seconds to ensure excellent visibility and easy operation in dark or low-light conditions. The dials are powered by an easily replaceable CR2032 coin cell battery.

Constructed with a robust solid metal housing and a zinc die-cast locking cover, the Key Garage provides reliable protection against unauthorised access. Security is managed via a resettable 4-digit combination lock, offering up to 10,000 possible codes. A sliding protective cover keeps the dials shielded from dirt and weather, while the flat inner mechanism and removable clip-in hooks help maximise and organise the internal space. It is suitable for wall mounting indoors or in protected outdoor areas.

Technical Specifications

- **External Height:** 120mm
- **External Width:** 84mm
- **External Depth:** 62mm
- **Weight:** 952g
- **Finish:** Black & Silver
- **Locking Mechanism:** 4-wheel combination (resettable)
- **Power Source:** CR2032 coin cell battery (replaceable)
- **Capacity:** Holds up to 50 keys or 30 cards
- **Manufacturer Reference:** 83856
- **Barcode:** 4003318828569

Brand Profile

Abus

ABUS (short for **August Bremicker Söhne**) is a **German, family-owned security company** best known for making locks and “preventative” security products—the stuff designed to stop problems *before* they happen. The company was founded in **1924**, when August Bremicker and his sons started making padlocks in a cellar forge in **Volmarstein** (North Rhine-Westphalia). One of the earliest products was a padlock they called **“Iron Rock,”** and the business expanded from there into a broad security portfolio.

Today, ABUS’s headquarters are in **Wetter (Ruhr), Germany**, and the company manufactures across multiple German and international sites (with major German production called out in places like **Rehe**).

ABUS operates as a group with well-known consumer lines spanning **padlocks and door/window security**, **alarm systems and video surveillance**, and also **bike security**—notably **bike locks** and **bike helmets** (a big reason you’ll see the brand everywhere from hardware stores to cycling shops).

Brand-wise, ABUS leans hard into the “German engineering, don’t mess about” identity: practical, durability-obsessed, and aimed at homes, businesses, and people trying to stop their stuff being yeeted into the void by opportunistic goblins.
