Specification Summary

Brand	Asec
Product type	Budget Locks

Product Description

The Asec Budget Lock with Square Follower is a simple, cost-effective, and reliable locking solution. It is ideal for low-security applications such as service hatches, cupboards, loft hatches, and access panels.

This budget lock features a 10mm square follower, making it compatible with standard square-drive budget keys (T-keys). It features a fully reversible design, allowing it to be easily installed on both left- and right-handed doors. The lock comes complete with a matching strike plate, ensuring you have the essential components required for a straightforward installation. With a robust 35mm bolt throw, it provides a secure latching mechanism for utility and maintenance doors.

Technical Specifications

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
