Specification Summary

Brand	Codelocks
Product type	CL600 Series

Product Description

The Codelocks CL0610 and CL0615 Marine Grade heavy-duty digital locks are engineered to withstand the harshest outdoor environments, making them ideal for coastal applications, workshops, and high-traffic areas. Featuring a specially enhanced, durable black finish and stainless steel buttons, these locks have been salt spray tested to 1,000 hours and include neoprene seals to prevent moisture ingress.

Operation is straightforward: entering the correct code allows the outside lever handle to retract the latch, whilst the spring-loaded latchbolt automatically locks upon closing. The inside lever handle provides free exit at all times.

Depending on your security needs, these locks are available with or without a passage set (code-free entry) option, and in fire-tested (BS EN 1634-1 compliant) or non-fire-tested variants. Please choose your preferred options for fire testing, passage set functionality, and manufacturer references from the selection below.

With over 8,000 non-sequential code combinations (4 to 6 digits), security is easily managed. The lock features a quick code change mechanism with tumbler alignment, allowing you to change the code on the door without removing the unit. An optional 'Clean by Codelocks' photocatalytic finish is also available to special order, providing enhanced protection against bacteria and viruses.

Please note: If you are ordering a front/back plate set to use on an existing lock case, you must test the current lock case first to ensure compatibility.

Technical Specifications

- **Brand:** Codelocks
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 65mm
- **Finish:** Marine Grade Black
- **Buttons:** 14 stainless steel buttons
- **Code Length:** 4 to 6 digits
- **Combinations:** 8,191 non-sequential combinations
- **Handing:** Reversible (non-handed)
- **Key Override:** Yes (supplied with 2 keys)
- **Operation Outside:** Lever handle on entry of correct code
- **Operation Inside:** Lever handle free exit
- **Fire Tested:** Yes or No (please choose from the options below)
- **Passage Set:** Yes or No (please choose from the options below)
- **Weight:** 3.509kg to 3.8kg (please choose from the options below)
- **Manufacturer Reference:** Multiple options available (please choose from the options below)
- **Standards:** BS EN 1634-1 (for fire-tested variants)
- **Latch:** 60mm standard tubular latch with anti-shim plunger

Key Features

- **Marine Grade Protection:** Salt spray tested to 1,000 hours with neoprene seals, making it perfect for coastal and harsh outdoor environments.
- **Quick Code Change:** Easily change codes on the door without the need to remove the lock.
- **High Traffic Durability:** Features a large three-coil lever return spring and full-size lever handles with return-to-door design.
- **Flexible Options:** Choose between models with or without passage set (code-free) functionality and fire-rated options from the selection below.
- **Key Override:** Includes key override functionality with 2 keys supplied for emergency access.
- **Limited Lifetime Guarantee:** Supported by Codelocks' limited lifetime guarantee on mechanical components.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
