Product Description

The ABUS 70IB Series Aqua Safe Marine Brass Padlock is engineered to deliver reliable security under extreme outdoor and marine conditions. Featuring a solid brass lock body and a stainless steel shackle, this padlock offers outstanding corrosion resistance, making it perfect for securing boats, trailers, and outdoor equipment.

To protect both the lock and your property, the padlock is encased in a shock-absorbing vinyl cover that prevents scratches on sensitive adjacent surfaces. The sealed lock body, complete with a protective keyhole cover and integrated drainage channels, prevents water and dirt from entering the precision pin cylinder. Security is further enhanced by a paracentric key profile and anti-pick mushroom pins.

This padlock is available in multiple body sizes and keying options, including Keyed Alike and Keyed To Differ. Please select your preferred body width, shackle diameter, and keying configuration from the options below.

Brand Profile

Abus

ABUS (short for **August Bremicker Söhne**) is a **German, family-owned security company** best known for making locks and “preventative” security products—the stuff designed to stop problems *before* they happen. The company was founded in **1924**, when August Bremicker and his sons started making padlocks in a cellar forge in **Volmarstein** (North Rhine-Westphalia). One of the earliest products was a padlock they called **“Iron Rock,”** and the business expanded from there into a broad security portfolio.

Today, ABUS’s headquarters are in **Wetter (Ruhr), Germany**, and the company manufactures across multiple German and international sites (with major German production called out in places like **Rehe**).

ABUS operates as a group with well-known consumer lines spanning **padlocks and door/window security**, **alarm systems and video surveillance**, and also **bike security**—notably **bike locks** and **bike helmets** (a big reason you’ll see the brand everywhere from hardware stores to cycling shops).

Brand-wise, ABUS leans hard into the “German engineering, don’t mess about” identity: practical, durability-obsessed, and aimed at homes, businesses, and people trying to stop their stuff being yeeted into the void by opportunistic goblins.
