Specification Summary

Brand	Gatemaster
Product type	Gate Locks

Product Description

The Gatemaster Weld-In Double Throw Euro Deadlock is a robust and durable locking solution designed to be welded directly into metal gate fabrications. This high-quality deadlock is ideal for a wide range of square-profile gate styles, providing reliable security with a double-throw deadbolt that extends a full 24mm.

Operating the lock is simple and secure: two full turns of the key from either side will fully shoot or retract the deadbolt. The lockcase is constructed from heavy-duty 2.5mm mild steel, making it perfect for welding and subsequent painting or galvanising. It comes complete with a double-sided 5-pin euro cylinder, three keys, and a flat bolt keep.

This deadlock is available in multiple case widths (40mm or 50mm) and weights (1.1kg or 1.17kg) to suit different gate frame profiles. Please select your preferred case width, manufacturer reference (GD40 or GD50), and barcode from the options below.

Technical Specifications

- **Brand:** Gatemaster
- **Backset:** 60mm
- **Bolt Throw:** 24mm
- **Case Depth:** 95mm
- **Case Height:** 90mm
- **Case Width:** 40mm or 50mm (please select from the options below)
- **Manufacturer Reference:** GD40 or GD50 (please select from the options below)
- **Weight:** 1.1kg or 1.17kg (please select from the options below)
- **Material:** Mild steel (2.5mm lockcase)
- **Mechanism:** Euro Cylinder (included)
- **Keys Supplied:** 3

Key Features

- **Weld-In Design:** Specifically engineered to be welded directly into metal gate fabrications.
- **Double Throw Bolt:** Deadbolt moves 24mm with two turns of the key for enhanced security.
- **Double-Sided Operation:** Can be operated by key from both sides of the gate.
- **Robust Construction:** Made with a durable 2.5mm mild steel lockcase.
- **Complete Package:** Supplied with a double-sided 5-pin euro cylinder, three keys, and a flat bolt keep.
- **Versatile Sizing:** Available in multiple case widths to suit different box section sizes (please select below).

Brand Profile

Gatemaster

Gatemaster is a UK manufacturer specialising in **gate locks and gate hardware** for **metal and wooden gates**, with a reputation built on one simple promise: **make it strong, make it weatherproof, and make it easy to fit** (because installers have better things to do than spend their afternoon arguing with a latch).

The company's story starts in **1995**, when founder **Simon** began making locks under the name **Signet Locks**, initially producing from his **garage in South London** before growing into a proper workshop and eventually scaling into a dedicated manufacturing operation. As the business expanded, the **manufacturing side became Gatemaster**, while **Signet** continued as the UK trading name in the same ecosystem.

Gatemaster's best-known product family is the **Superlock** series—bolt-on gate locks offered in variants like **key + handle**, **mechanical keypad (code) access**, and even **panic-exit** options—designed for heavy outdoor use and installer-friendly fitting. The company leans hard into "bolt-on simplicity": many of their locks are marketed as installable by drilling a small number of holes and fastening the unit to the gate frame.

Operationally, Gatemaster is based in **Bognor Regis, West Sussex** (with warehousing/distribution also referenced there), and the UK company record for **GATEMASTER LTD** lists its registered office at **Unit 5 Dickinson Place, Durban Road Industrial Estate, Bognor Regis, PO22 9QU**.
