Is Cylinder

Product Description

The Mul-T-Lock Interactive+ (MTL600) Euro Turn Cylinder offers a premium high-security locking solution for residential and commercial doors. Featuring a convenient thumbturn on the inside, it allows for quick, keyless egress in an emergency while maintaining robust, key-operated security on the outside.

At the heart of this cylinder is Mul-T-Lock's advanced telescopic pin tumbler mechanism, which requires the simultaneous alignment of both internal and external shear lines. Combined with a patented spring-loaded floating element in the key, this technology creates a "virtual combination" that provides exceptional resistance against picking, drilling, bumping, and unauthorised key duplication. Duplicate keys can only be cut upon presentation of the unique security card provided.

These high-security cylinders are available in a wide range of overall lengths from 62mm up to 100mm, with various offset configurations, and come in both Brass and Satin Nickel finishes. Please select your required size and finish from the options below.

Technical Specifications

- **Cylinder Type:** Euro profile key and turn (thumbturn)
- **Security Platform:** Mul-T-Lock Interactive+ (MTL600)
- **Mechanism:** Telescopic pin tumbler system
- **Finishes:** Brass and Satin Nickel
- **Lengths Available:** 62mm to 100mm (various offsets)
- **Key Security:** Patented key control with security card authorization
- **Key Type:** Reversible dimple key

Key Features

- **Convenient Egress:** Thumbturn on the inside allows for quick, keyless locking and unlocking, making it ideal for emergency exit doors.
- **Patented Key Protection:** Prevents unauthorised key copying, with additional keys only cut upon presentation of the included security card.
- **Anti-Bypass Technology:** High-precision telescopic pins and steel inserts provide robust resistance against picking, drilling, and bumping.
- **Innovative Floating Element:** Key features a moving element that interacts with a spring-loaded pin in the plug to form a secure virtual combination.
- **Flexible Options:** Available in multiple sizes and finishes to suit your door thickness and style - please choose from the options below.

Brand Profile

Multlock

Mul-T-Lock (sometimes typed “Multlock”) is an Israeli high-security locking brand best known for **high-security cylinders**, **patented key systems**, and **mechanical + electromechanical access solutions** aimed at locksmiths, institutions, and commercial sites where key control and attack resistance actually matter.

- **Founded: 1973** in Israel (Mul-T-Lock states “founded in Israel in 1973”).
- **Ownership: Fully owned by ASSA ABLOY**; ASSA ABLOY completed the acquisition on **31 Jan 2000** (consolidated from 1 Feb 2000).

What it’s known for (the “why you’d stock it” bit)

- **High-security mechanical cylinders & keys** with strong key-control stories (patented platforms, restricted profiles, etc.).
- **Electromechanical upgrades** (turning “just a cylinder” into managed access) alongside classic mechanical master-keying for bigger sites.
- A big “locksmith channel” identity: Mul-T-Lock explicitly positions itself as a **locksmiths’ preferred partner**, with authorised centres and support tooling.

Tiny lore nugget

Their early growth story is tied to a “multi-directional / four-way” locking concept that helped launch the brand internationally, and later expansion into more advanced cylinder platforms.
