Specification Summary

Brand	Abus
Product type	Key Safe

Product Description

The ABUS 787 Key Garage is a secure, wall-mounted key safe designed to provide convenient and controlled access to keys and plastic cards. It is an ideal solution for sharing access with family members, carers, tradespeople, or holiday guests, eliminating the need to hide keys under doormats or flowerpots.

Constructed with a robust metal housing and a zinc die-cast locking cover, this key safe offers strong resistance against tampering. It features a customisable 4-digit combination lock that can be easily reset whenever access permissions need to change. To protect the dials from harsh weather, dust, and dirt, the unit is fitted with a sliding protective cover.

Inside, the Key Garage has a spacious compartment that can accommodate up to 20 keys or 14 plastic cards. It also includes removable clip-in hooks to keep keys organised. Designed for secure surface mounting, the fixing screws are hidden behind the door once closed, preventing unauthorised removal.

Technical Specifications

- **Brand:** Abus
- **Model:** 787 Key Garage
- **Mounting Type:** Wall mounted (surface mount)

- **Locking Mechanism:** 4-digit resettable combination
- **External Width:** 80mm

Brand Profile

Abus

ABUS (short for **August Bremicker Söhne**) is a **German, family-owned security company** best known for making locks and "preventative" security products—the stuff designed to stop problems *before* they happen. The company was founded in **1924**, when August Bremicker and his sons started making padlocks in a cellar forge in **Volmarstein** (North Rhine-Westphalia). One of the earliest products was a padlock they called **"Iron Rock,"** and the business expanded from there into a broad security portfolio.

Today, ABUS's headquarters are in **Wetter (Ruhr), Germany**, and the company manufactures across multiple German and international sites (with major German production called out in places like **Rehe**).

ABUS operates as a group with well-known consumer lines spanning **padlocks and door/window security**, **alarm systems and video surveillance**, and also **bike security**—notably **bike locks** and **bike helmets** (a big reason you'll see the brand everywhere from hardware stores to cycling shops).

Brand-wise, ABUS leans hard into the "German engineering, don't mess about" identity: practical, durability-obsessed, and aimed at homes, businesses, and people trying to stop their stuff being yeeted into the void by opportunistic goblins.
