Specification Summary

Brand	Abus
Product type	Key Safe

Product Description

The ABUS 787 LED Dial Wall Mounting Key Garage offers a secure and highly convenient solution for storing keys and plastic cards. Designed with a robust metal housing and a zinc die-cast locking cover, this key safe provides reliable protection for up to 20 keys or 14 cards. It is an ideal choice for shared access requirements, making it perfect for carers, tradespeople, holiday home guests, or simply as a secure backup for emergency entry.

Equipped with a user-resettable 4-digit combination lock, the KeyGarage features integrated LED-illuminated dials that remain lit for approximately 30 seconds, ensuring effortless operation even in complete darkness. A sliding protective cover shields the dials from dirt and weather, ensuring long-term reliability. Suitable for wall mounting indoors or in sheltered outdoor areas, it comes complete with the necessary fixings and a replaceable CR2032

battery.

Brand Profile

Abus

ABUS (short for **August Bremicker Söhne**) is a **German, family-owned security company** best known for making locks and "preventative" security products—the stuff designed to stop problems *before* they happen. The company was founded in **1924**, when August Bremicker and his sons started making padlocks in a cellar forge in **Volmarstein** (North Rhine-Westphalia). One of the earliest products was a padlock they called **"Iron Rock,"** and the business expanded from there into a broad security portfolio.

Today, ABUS's headquarters are in **Wetter (Ruhr), Germany**, and the company manufactures across multiple German and international sites (with major German production called out in places like **Rehe**).

ABUS operates as a group with well-known consumer lines spanning **padlocks and door/window security**, **alarm systems and video surveillance**, and also **bike security**—notably **bike locks** and **bike helmets** (a big reason you'll see the brand everywhere from hardware stores to cycling shops).

Brand-wise, ABUS leans hard into the "German engineering, don't mess about" identity: practical, durability-obsessed, and aimed at homes, businesses, and people trying to stop their stuff being yeeted into the void by opportunistic goblins.
