Specification Summary

Brand	Abus
Product type	Key Safe

Product Description

The ABUS 797 Key Garage Key Safe with Shackle offers a secure, portable, and highly convenient solution for storing keys and access cards. Designed for shared access, it is ideal for allowing trusted visitors - such as cleaners, tradespeople, carers, or holiday guests - to access a property without the need for duplicate keys.

Constructed with a robust solid metal housing and a zinc die-cast locking cover, this key safe provides reliable protection. Its portable shackle design allows you to easily attach it to door handles, gates, or railings without any drilling or permanent installation. To prevent damage to your property, both the shackle and the housing are plastic-coated to protect paintwork and surfaces from scratches.

The key safe features a large internal capacity, holding up to 20 keys or 14 plastic cards. Access is controlled via a resettable 4-digit combination dial, which is protected from dust, dirt, and harsh weather by a sliding protective cover.

Technical Specifications

- **Brand:** ABUS
- **Model Reference:** 797 C Key Garage with Shackle
- **Locking Mechanism:** Resettable 4-digit combination

- **Width:** 80mm
- **Depth:** 43mm

Brand Profile

Abus

ABUS (short for **August Bremicker Söhne**) is a **German, family-owned security company** best known for making locks and "preventative" security products—the stuff designed to stop problems *before* they happen. The company was founded in **1924**, when August Bremicker and his sons started making padlocks in a cellar forge in **Volmarstein** (North Rhine-Westphalia). One of the earliest products was a padlock they called **"Iron Rock,"** and the business expanded from there into a broad security portfolio.

Today, ABUS's headquarters are in **Wetter (Ruhr), Germany**, and the company manufactures across multiple German and international sites (with major German production called out in places like **Rehe**).

ABUS operates as a group with well-known consumer lines spanning **padlocks and door/window security**, **alarm systems and video surveillance**, and also **bike security**—notably **bike locks** and **bike helmets** (a big reason you'll see the brand everywhere from hardware stores to cycling shops).

Brand-wise, ABUS leans hard into the "German engineering, don't mess about" identity: practical, durability-obsessed, and aimed at homes, businesses, and people trying to stop their stuff being yeeted into the void by opportunistic goblins.
