Specification Summary

Brand	Abus
Product type	Body Only

Product Description

The ABUS 83WP/63 (Extreme Series) Weatherproof Steel Open Shackle Padlock is supplied as a **body-only** unit, without a cylinder. This allows locksmiths and security professionals to easily integrate the padlock into existing master key suites or custom-keyed systems by installing a compatible cylinder of their choice.

Engineered for extreme outdoor environments, this padlock features a solid hardened steel alloy body and shackle fully encased in a high-impact plastic jacket. It is designed with integrated drainage channels to channel moisture away, alongside a protective rubber keyway cover that shields the cylinder from dirt, dust, and water. The shackle is

finished with ABUS's proprietary NANO PROTECT™ coating, providing exceptional corrosion resistance.

For robust physical security, the padlock utilizes a double ball-bearing locking mechanism, offering high resistance against pulling, twisting, and lever attacks. The rekeyable design is highly adaptable and can be configured for either key-retaining or non-key-retaining operation to suit your specific security requirements.

Technical Specifications

- **Brand:** Abus
- **Manufacturer Reference:** 83WP/63 No Cyl
- **Body Width:** 65mm
- **Body Height:** 109.5mm
- **Body Depth:** 34.5mm
- **Shackle Diameter:** 11mm
- **Horizontal Clearance:** 25mm
- **Vertical Clearance:** 33mm
- **Shackle Finish:** Nano Plated Steel
- **Locking Mechanism:** Double ball bearing (rekeyable)
- **Key Retaining:** Yes (configurable)
- **Weight:** 456g

Key Features

- **Body Only Design:** Supplied without a cylinder, allowing for custom integration into existing master key suites or bittings.
- **Extreme Weather Protection:** Features a full plastic jacket, integrated drainage channels, and a protective keyway cover to shield against harsh outdoor elements.
- **High Corrosion Resistance:** Hardened steel alloy shackle with NANO PROTECT™ coating for long-lasting durability in wet or coastal environments.
- **Robust Security:** Double ball-bearing locking mechanism resists pulling, torsion, and lever attacks.
- **Adaptable Functionality:** Rekeyable mechanism can be configured for key-retaining or non-key-retaining operation.

Brand Profile

Abus

ABUS (short for **August Bremicker Söhne**) is a **German, family-owned security company** best known for making locks and "preventative" security products—the stuff designed to stop problems *before* they happen. The company was founded in **1924**, when August Bremicker and his sons started making padlocks in a cellar forge in **Volmarstein** (North Rhine-Westphalia). One of the earliest products was a padlock they called **"Iron Rock,"** and the business expanded from there into a broad security portfolio.

Today, ABUS's headquarters are in **Wetter (Ruhr), Germany**, and the company manufactures across multiple German and international sites (with major German production called out in places like **Rehe**).

ABUS operates as a group with well-known consumer lines spanning **padlocks and door/window security**, **alarm systems and video surveillance**, and also **bike security**—notably **bike locks** and **bike helmets** (a big reason you'll see the brand everywhere from hardware stores to cycling shops).

Brand-wise, ABUS leans hard into the "German engineering, don't mess about" identity: practical, durability-obsessed, and aimed at homes, businesses, and people trying to stop their stuff being yeeted into the void by opportunistic goblins.
