### Product Description

The Adams Rite 1354-0306 Glass Door Bracket is a specialised mounting solution designed for installing the Adams Rite 1354 surface-mounted Mini-Electro-Shearmagnet onto frameless glass doors. This bracket provides a reliable and secure way to integrate electric locking and access control systems into modern glass entryways, making it ideal for commercial and retail environments.

Engineered for durability and a clean aesthetic, the bracket is compatible with glass thicknesses of 10mm and 12mm. It features a sleek silver finish that blends seamlessly with contemporary door hardware.

Please note that installation requires an industrial-strength, two-part metal-to-glass adhesive (not included). For glass-to-glass applications (where both the door and the header frame are glass), two brackets will be required - one for the magnet housing and one for the armature housing.

## Technical Specifications

- **Brand:** Adams Rite
- **Manufacturer Reference:** 1354-0306
- **Finish:** Silver
- **Fitting:** Glass doors (10mm to 12mm thickness)

- **Depth:** 15mm
- **Width:** 175mm
- **Weight:** 470g

## Brand Profile

Adams Rite

**Adams Rite** is a long-running American door-hardware brand best known as *“the Aluminum Hardware Authority”*—a specialist in locking and access hardware for **narrow-stile aluminum doors** (think storefronts, commercial entrances, glass-and-aluminum door systems).

The company’s core range covers **deadlocks and deadlatches**, **electric strikes**, **exit devices/panic hardware**, **trim**, and related cylinders/accessories—basically the mechanical and electromechanical guts that let commercial aluminum doors stay secure while still being code-compliant and usable.

**Adams Rite is part of ASSA ABLOY**, following ASSA ABLOY’s acquisition (announced and completed in **2006**). In ASSA ABLOY’s portfolio, Adams Rite is positioned as a strong, complementary brand in aluminum door applications.
