Specification Summary

Brand	Adams Rite
Product type	Accessory

Product Description

The Adams Rite 4051 Trim Faceplate is a high-quality, flat faceplate designed specifically for use with the Adams Rite MS2200 series hookbolt. This durable accessory helps to increase protection to the hookbolt when locked, enhancing the overall security of your metal door setup.

In addition to its primary role as a protective faceplate, this versatile component can also be used as a strike plate. Manufactured from robust anodised aluminium, it offers excellent corrosion resistance and a clean, professional finish that blends seamlessly with modern commercial door hardware. It is supplied as a single unit, making it a simple and cost-effective solution for maintaining or upgrading your existing Adams Rite locking systems.

Brand Profile

Adams Rite

Adams Rite is a long-running American door-hardware brand best known as *“the Aluminum Hardware Authority”*—a specialist in locking and access hardware for **narrow-stile aluminum doors** (think storefronts, commercial entrances, glass-and-aluminum door systems).

The company’s core range covers **deadlocks and deadlatches**, **electric strikes**, **exit devices/panic hardware**, **trim**, and related cylinders/accessories—basically the mechanical and electromechanical guts that let commercial aluminum doors stay secure while still being code-compliant and usable.

Adams Rite is part of ASSA ABLOY, following ASSA ABLOY’s acquisition (announced and completed in **2006**). In ASSA ABLOY’s portfolio, Adams Rite is positioned as a strong, complementary brand in aluminum door applications.
