Product Description

The Adams Rite 91-0171 Release Extension Lip is designed for use with Adams Rite electric strikes, including the 7100, 7110, 7111, 7130, and 7140 series. It is the ideal solution for centre-hung doors, thick doors, or any application where the door centerline to jamb edge dimension varies from standard.

This bolt-on extension lip is measured from the edge of the frame to the centre of the release. For existing electric strikes, installation is straightforward: a thin metal membrane in the standard lip can be drilled or punched out, allowing the extension lip to be easily fitted in the field.

These extension lips are available in multiple options, including lengths of 50mm, 57mm, and 63mm, with corresponding manufacturer references (91-0171-05, 91-0171-07, and 91-0171-09) and weights ranging from 50g to 890g. Please choose your required size and specification from the options below.

Brand Profile

Adams Rite

Adams Rite is a long-running American door-hardware brand best known as *“the Aluminum Hardware Authority”*—a specialist in locking and access hardware for **narrow-stile aluminum doors** (think storefronts, commercial entrances, glass-and-aluminum door systems).

The company’s core range covers **deadlocks and deadlatches**, **electric strikes**, **exit devices/panic hardware**, **trim**, and related cylinders/accessories—basically the mechanical and electromechanical guts that let commercial aluminum doors stay secure while still being code-compliant and usable.

Adams Rite is part of ASSA ABLOY, following ASSA ABLOY’s acquisition (announced and completed in **2006**). In ASSA ABLOY’s portfolio, Adams Rite is positioned as a strong, complementary brand in aluminum door applications.
