Product Description

The Adams Rite MS4052 Reinforcing Plate is a robust security accessory designed specifically for use with the Adams Rite 2200 Barbolt lock series. Engineered to provide an extra layer of physical security, this plate reinforces the lock installation to help protect against forced entry attempts and tampering.

Manufactured from high-quality plated steel, the MS4052 offers excellent durability and strength, making it ideal for both commercial and residential applications where enhanced security is required. It is supplied complete with the necessary fixing screws, allowing for a quick and straightforward installation process. Whether you are upgrading an existing setup or completing a new installation, this reinforcing plate ensures your Adams Rite 2200 series lock performs at its best.

Brand Profile

Adams Rite

Adams Rite is a long-running American door-hardware brand best known as *“the Aluminum Hardware Authority”*—a specialist in locking and access hardware for **narrow-stile aluminum doors** (think storefronts, commercial entrances, glass-and-aluminum door systems).

The company’s core range covers **deadlocks and deadlatches**, **electric strikes**, **exit devices/panic hardware**, **trim**, and related cylinders/accessories—basically the mechanical and electromechanical guts that let commercial aluminum doors stay secure while still being code-compliant and usable.

Adams Rite is part of ASSA ABLOY, following ASSA ABLOY’s acquisition (announced and completed in **2006**). In ASSA ABLOY’s portfolio, Adams Rite is positioned as a strong, complementary brand in aluminum door applications.
