Product Description

The Adams Rite S235 DO8R04 628 Faceplate Screw is a high-quality replacement screw designed specifically to secure the faceplates of Adams Rite mortice locks. Ideal for maintenance, repairs, or fresh installations, this flat-head screw ensures your lock's faceplate remains firmly in place, maintaining both the security and neat appearance of your metal door locks.

Manufactured to Adams Rite's exacting standards, this durable steel screw is a direct replacement part, ensuring perfect compatibility and hassle-free installation. It is sold individually, allowing you to purchase the exact quantity needed for your specific job without unnecessary waste.

Technical Specifications

Brand Profile

Adams Rite

Adams Rite is a long-running American door-hardware brand best known as *“the Aluminum Hardware Authority”*—a specialist in locking and access hardware for **narrow-stile aluminum doors** (think storefronts, commercial entrances, glass-and-aluminum door systems).

The company’s core range covers **deadlocks and deadlatches**, **electric strikes**, **exit devices/panic hardware**, **trim**, and related cylinders/accessories—basically the mechanical and electromechanical guts that let commercial aluminum doors stay secure while still being code-compliant and usable.

Adams Rite is part of ASSA ABLOY, following ASSA ABLOY’s acquisition (announced and completed in **2006**). In ASSA ABLOY’s portfolio, Adams Rite is positioned as a strong, complementary brand in aluminum door applications.
