Specification Summary

Brand	Asec
Product type	Component

Product Description

The Asec 10 Pack of Diodes (AS9753) is a vital component for access control installations and general low-voltage electronic circuit protection. These semiconductor diodes are designed to allow electrical current to flow in only one direction, effectively safeguarding sensitive electronic equipment from back EMF (electromotive force) and transient voltage spikes.

In access control systems, these diodes are commonly installed across electromagnetic locks, electric strikes, or keypads to prevent inductive kickback from damaging power supplies, readers, or control panels. Rated for a maximum of 50V DC, they provide reliable protection in standard low-voltage setups. They are supplied in a convenient, bagged pack of 10, ensuring you have a reliable supply of essential circuit protection devices ready for

your next installation.

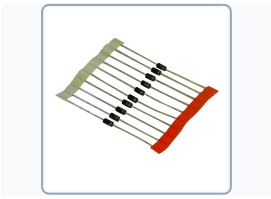

Technical Specifications

- **Brand:** Asec
- **Manufacturer Reference:** AS9753
- **Input Voltage:** Max 50V DC
- **Rating:** 50V DC Max
- **Pack Quantity:** 10
- **Finish:** Black
- **Weight:** 4g
- **Packaging:** Bagged
- **Barcode:** 5055120623016

Key Features

- **Circuit Protection:** Allows current to flow in one direction to protect sensitive electronics from voltage spikes and back EMF.
- **Access Control Friendly:** Ideal for use with electric strikes, magnetic locks, and keypads.
- **Convenient Pack:** Supplied in a pack of 10 to ensure you have spares on hand for multiple installations.
- **Reliable Rating:** Suitable for low-voltage applications up to 50V DC.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
