Specification Summary

Brand	Asec
Product type	Finger

Product Description

The Asec 100mm Wide Aluminium Finger Plate is a practical and durable solution designed to protect doors from wear, tear, and unsightly finger marks. Ideal for both commercial and domestic environments with high footfall, this finger plate helps maintain the appearance of your doors while offering a clean, modern aesthetic.

Manufactured from high-quality anodised aluminium, this plate features a satin finish that resists corrosion and is easy to wipe clean. It comes pre-drilled with countersunk screw holes, ensuring a quick and straightforward installation with a neat, flush-fitting finish.

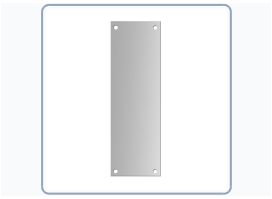

Technical Specifications

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
