Specification Summary

Brand	Asec
Product type	Cut

Product Description

The Asec 48 4-Lever Boxlock is a high-quality, traditional cabinet lock designed specifically to secure wooden boxes, chests, and cabinets. It features a robust 4-lever locking mechanism that provides reliable security for your valuable items.

This screw-fixed boxlock is designed to be cut into the wood on the inside of the box, while the included matching brass keep is attached to the lid. When the lid is closed, the keep locks securely directly into the body of the lock. Finished in an attractive satin brass, this lock blends seamlessly with traditional wooden furniture and cabinetry.

It is supplied keyed to differ and comes complete with two keys, making it a practical and secure choice for both restoration projects and new furniture builds.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
