Specification Summary

Brand	Asec
Product type	Butt

Product Description

The Asec 75mm Loose Pin Butt Hinges are a practical and reliable choice for door installations. Sold in pairs, these high-quality hinges feature a loose pin design that connects the two halves. Once the pin is removed, the hinges can be separated, allowing the door to be easily removed for maintenance, painting, or decorating without the hassle of unscrewing the hinges from the frame.

Each hinge is designed with countersunk screw holes to ensure a flush, neat finish once installed. They are available in multiple finishes, including Electro Brass and Polished Chrome, and come in either Boxed or Visi packaging options. Please select your preferred finish, packaging, and manufacturer reference from the options below to suit your requirements.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
