Specification Summary

Brand	Asec
Product type	Finger

Product Description

The Asec 75mm Wide Aluminium Finger Plate is a practical and durable solution designed to protect door surfaces from wear, tear, and finger marks in busy environments. Manufactured from high-quality 1.5mm thick anodised aluminium, this finger plate features a sleek Satin Anodised Aluminium (SAA) finish that blends seamlessly with modern commercial and residential door furniture.

It is easy to install and designed for quick screw-fixing. This finger plate is available in multiple lengths (22.5cm and 30cm) and weights (70g and 90g) to suit your specific door requirements. Please choose your preferred size and specification from the options below.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
