Specification Summary

Brand	Asec
Product type	Finger

Product Description

The Asec 75mm Wide Stainless Steel Finger Plate is a practical and durable solution designed to protect door surfaces from wear, tear, and unsightly finger marks. Ideal for both commercial and residential environments, this finger plate helps maintain a clean, professional appearance on high-traffic doors.

Crafted from robust 1.5mm thick stainless steel with a high-quality satin finish, it offers excellent resistance to corrosion and daily wear. The plate features a pre-drilled design for straightforward screw-on installation, ensuring a secure and flush fit to the door surface.

This finger plate is available in multiple lengths, weights, and manufacturer references to suit your specific door requirements. Please choose your preferred size and specification from the options below.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
