Specification Summary

Brand	Asec
Product type	Catches

Product Description

The Asec Adjustable Roller Catch is a high-quality, mortice-fitted roller catch designed to keep doors securely closed without the need for a traditional lever handle. Operated simply by a push or pull action on the door, it is an ideal solution for cupboards, wardrobes, and internal doors where a clean, handle-free look or simple latching is desired.

Featuring a robust sprung mechanism, this roller catch offers excellent flexibility with a 5mm gap adjustment and adjustable spring tension, which can be easily tuned using the integrated nut. This allows you to customise the holding force and operation to perfectly suit your door's weight and alignment.

It comes complete with a matching strike plate and features countersunk screw holes for a neat, flush installation. Finished in a modern satin chrome, this durable catch blends seamlessly with contemporary interior hardware.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
