Specification Summary

Brand	Asec
Product type	Non Deadlocking

Product Description

The Asec AS17 Non-Deadlocking Nightlatch is a reliable security solution designed specifically for egress applications, such as student accommodation, hotels, and communal residential doors. Because this lever-action nightlatch cannot be deadlocked, the internal lever always remains active, ensuring a safe and reliable means of escape in an emergency.

An internal holdback snib is featured, which allows the latch to be locked in the retracted (open) position for convenient free passage. Crucially, the snib cannot be used to lock the latch in the closed position, preventing accidental lockouts and ensuring compliance with emergency exit requirements.

This nightlatch is suitable for timber doors up to 57mm thick (or 54mm if installed with an external cylinder pull) and features a standard 60mm backset. It is available in multiple finishes, including Chrome Plated and Dull Metal Grey with a Polished Brass cylinder. Please select your preferred finish option from the choices below.

Technical Specifications

- **Backset:** 60mm
- **Door Thickness:** Up to 57mm (or 54mm when used with a cylinder pull)
- **Cylinder System:** Asec 5-pin nightlatch cylinder (where supplied)
- **Keying:** Keyed to differ (with in-house keying options available)
- **Case Finishes:** Available in Chrome Plated or Dull Metal Grey (please select from the options below)

Key Features

- **Non-Deadlocking Design:** Cannot be deadlocked from either side, ensuring the internal lever always allows free egress.
- **Egress Approved:** Ideal for high-occupancy buildings, hotels, and student accommodation where emergency escape routes must remain clear.
- **Holdback Snib:** Internal snib holds the latch in the retracted position for free passage, but cannot lock the door shut.
- **Versatile Finishes:** Choose from multiple finish options below to match your existing door hardware.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
