## Product Description

The Asec AS2300 Series mechanical digital door lock is a versatile and cost-effective solution designed to restrict access to authorised code-holding personnel only. Suitable for both internal and external applications, this keyless entry lock is ideal for commercial and domestic environments alike.

A key benefit of this model is its optional holdback (hold open) facility. The sliding switch can be easily reversed and used as a blanking plate if the hold open function is not required, giving you complete control over access. The user-programmable code is simple to change, offering over 1,000 possible combinations for reliable security.

This digital lock is supplied complete with a 60mm backset tubular latch, fixings, and a 5-year mechanical guarantee. It is designed for straightforward installation on doors between 35mm and 60mm thick.

The Asec AS2300 Series is available in multiple finishes, including Polished Brass and Satin Chrome, with corresponding manufacturer references AS2300 and AS2301. Please choose your preferred finish and reference from the options below.

## Technical Specifications

- **Brand:** Asec
- **Manufacturer Reference:** AS2300 / AS2301 (Please choose from the options below)
- **Finish:** Polished Brass / Satin Chrome (Please choose from the options below)
- **Backset:** 60mm

## Brand Profile

Asec

**ASEC** is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
