Specification Summary

Brand	Asec
Product type	Asec

Product Description

The Asec AS3300 Series Round Knob Operated Easy Code Change Digital Lock is a versatile, light-to-medium duty mechanical digital lock designed for both internal and external timber doors. This model features a convenient on-door code change function, allowing you to update the entry code quickly and easily without having to remove the unit from the door.

Equipped with a robust 60mm anti-thrust latch, this digital lock provides enhanced security by protecting against tampering. It is fully reversible, making it suitable for both left and right-handed doors. It also features an optional holdback snib, giving you the flexibility to leave the door unlocked when free passage is required. Finished in a durable Stainless Steel PVD, this digital lock offers over 4,000 possible code combinations for reliable access control.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
