Specification Summary

Brand	Asec
Product type	Asec

Product Description

The Asec AS4300 Series Lever Operated Digital Lock is a heavy-duty, mechanical combination lock designed for medium to heavy-duty use on internal or external timber doors. Supplied complete with lever handles but without a latch, this unit is ideal for installations where you already have an existing latch or lock case in place, or for integration with specific panic hardware.

It features a robust clutched handle mechanism designed to slip under excessive force, protecting the internal lock components from vandalism and forced entry. The lock is equipped with 12 large, indented buttons providing over

2,000 possible code combinations. Finished with a hard-wearing PVD stainless steel coating, it offers excellent durability and weather resistance.

This digital lock is fully reversible for left or right-handed doors and is suitable for door thicknesses ranging from 35mm to 65mm.

This series is available in multiple options, including the standard AS4304 model and the AS4305 model which features an optional free passage function. Please choose your preferred manufacturer reference and barcode from the options below.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
