## Product Description

The Asec AS4300 Series Lever Operated Easy Code Change Digital Lock (AS4306) is a robust and versatile mechanical keyless entry solution designed for medium to heavy-duty use on internal or external timber doors. This model features a highly convenient "on-door" code change function, allowing users to update the access code quickly and easily using the supplied key, without the hassle of removing the lock unit from the door.

Equipped with a free-turning lever handle, the lock is designed to resist forced entry attempts by only engaging the mechanism once the correct code is entered. It features 12 large, indented buttons and offers over 1,000 possible code combinations for reliable security. This unit is supplied without a latch, making it an ideal choice for retrofitting or pairing with existing locks that feature an 8mm square follower. It also includes an optional free passage mode, allowing unrestricted access when required, and is fully reversible to suit both left and right-handed doors.

## Technical Specifications

- **Brand:** Asec
- **Manufacturer Reference:** AS4306
- **Finish:** Stainless Steel
- **Buttons:** 12 large indented buttons
- **Code Combinations:** 1,000+
- **Door Thickness:** 35mm to 65mm

## Brand Profile

Asec

**ASEC** is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
