Specification Summary

Brand	Asec
Product type	Ball Bearing

Product Description

The Asec AS1500 Double Ball Bearing Hinge is a premium door hardware solution designed to support heavier domestic and commercial timber doors. Featuring a double ball bearing mechanism, this hinge ensures a smooth, low-friction, and quiet swinging action, significantly reducing wear and tear compared to standard butt hinges.

Crafted with a classic button tip design, it adds a touch of traditional sophistication to any door. The hinge is finished in a high-quality polished brass, making it an excellent choice for both classic and contemporary interiors. It is supplied complete with matching fixing screws, allowing for a quick and hassle-free installation.

Technical Specifications

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
