Specification Summary

Brand	Asec
Product type	Combination

Product Description

The Asec Brass Open Shackle Combination Padlock is a reliable and convenient security solution, ideal for securing lockers, luggage, toolboxes, and other everyday items. Constructed with a solid brass body and a durable steel shackle, this padlock offers a robust physical barrier while eliminating the hassle of carrying keys.

This padlock features a user-resettable combination mechanism, allowing you to easily set and change your own personalised code. Depending on the size selected, the lock operates with either a 3-wheel or 4-wheel combination.

Available in multiple sizes, you can choose the ideal body width, shackle diameter, and clearance dimensions to suit your specific requirements. Please select your preferred options from the choices below.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
