Product Description

The Asec Concealed Soft Close Cabinet Hinge is a high-quality, sprung hinge designed to provide a smooth and quiet closing action for cabinet doors. Ideal for both new installations and upgrading existing kitchen or bathroom cupboards, this hinge features an integrated soft-close mechanism that prevents doors from slamming.

With a durable zinc-plated finish, these hinges offer excellent resistance to wear and corrosion, ensuring long-lasting performance. They are designed to be concealed from view when the cabinet door is closed, maintaining a clean and modern aesthetic. Each pack contains a pair of hinges and is supplied complete with fixing screws for a straightforward installation.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
