## Product Description

The Asec Cubicle Rubber Door Stopper is a sturdy nylon buffer designed to protect cubicle doors from damage caused by slamming or misuse. Ideal for commercial washrooms, changing rooms, and office facilities, these durable buffers help absorb impact and extend the lifespan of your cubicle doors and hardware.

Available in two configurations, these stoppers can be selected to suit either open-in or open-out cubicle doors. The open-in option features an 18mm diameter and an 8mm height, while the open-out option has a 20mm diameter and a 15mm height. Each buffer is supplied complete with wood screws for quick and straightforward installation.

Please choose your required door type, diameter, and height from the options below to ensure the perfect fit for your cubicle setup.

## Brand Profile

Asec

**ASEC** is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
