Specification Summary

Brand	Asec
Product type	Entrance

Product Description

The Asec Entrance Knobset is a practical and secure locking solution designed for entrance doors. It features a key-operated exterior knob for secure entry, paired with a convenient interior thumbturn (snib) for quick locking and unlocking from the inside.

This complete set is supplied with an adjustable tubular latch, allowing you to set the backset to either 60mm or 70mm during installation to suit your door's existing preparation. It comes boxed with all necessary fixing screws, fitting instructions, and three keys.

The knobset is available in multiple finishes, including Polished Brass and Stainless Steel, to match your door hardware. Please choose your preferred finish, barcode, and manufacturer reference from the options below.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
