## Product Description

The Asec Georgian Polished Brass Finger Plate is an elegant and practical addition to traditional doors. Designed to protect your door's woodwork and paint from everyday wear, tear, and finger marks, this push plate features a classic Georgian design that beautifully complements period properties and classic interior decors.

Crafted from high-quality polished brass, this finger plate offers a bright, reflective finish that adds a touch of sophistication to your home or office. It measures 305mm in length by 73mm in width, making it an ideal fit for most standard internal doors.

Installation is quick and straightforward, as the plate comes complete with matching fixing screws. Whether you are updating existing door furniture or installing a new door, this Asec Georgian finger plate provides a durable, stylish, and functional solution.

## Brand Profile

Asec

**ASEC** is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
