Specification Summary

Brand	Asec
Product type	Outside Access Device

Product Description

The Asec Lever Operated Outside Access Device (OAD) is a robust, high-security external handle designed to work in conjunction with internal emergency exit hardware, such as panic bars or push pads. It provides a secure, reliable method for authorised personnel to gain entry from the outside of a building through emergency exit doors.

A standout security feature of this unit is its anti-vandal clutch mechanism. When locked, the lever handle rotates freely without engaging the latch mechanism, protecting the internal components from being forced, snapped, or damaged by vandals.

This versatile device is suitable for both timber and metal doors ranging from 40mm to 70mm in thickness. It is fully reversible to suit left or right-handed doors and is supplied complete with a high-quality Cisa Euro cylinder. Additionally, the lever design is BS 8300 compliant, making it suitable for inclusive building accessibility.

Technical Specifications

- **Manufacturer Reference:** AS3107
- **Finish:** Silver Enamelled
- **Handing:** Reversible
- **Mechanism:** Euro Cylinder (supplied with Cisa Euro cylinder)
- **Door Thickness:** Suitable for doors between 40mm and 70mm thick
- **Door Type:** Timber and metal doors
- **Height:** 175mm

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
