Specification Summary

Brand	Asec
Product type	Key Ring

Product Description

The Asec Metal Carabiner Key Ring is a practical and convenient solution for keeping keys secure and organised. Supplied on a card of 12, these carabiner-style key rings are ideal for retail display, trade use, or for anyone needing multiple reliable key holders.

These metal key rings feature a spring-loaded gate for quick and easy attachment to belt loops, bags, or other straps, ensuring keys are always within reach. They are supplied in assorted vibrant colours, making key identification simple and efficient.

We offer these carabiner key rings in multiple lengths, ranging from 60mm to 70mm, with pack weights of 140g or 150g depending on the size selected. Please choose your preferred length, weight, and manufacturer reference from the options below to suit your requirements.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
