Specification Summary

Brand	Asec
Product type	Tower

Product Description

The ASEC Necked Tower Bolt is a traditional and robust security solution designed specifically for doors, gates, and cupboards where the frame is not flush with the door. Unlike standard straight tower bolts, the necked design features a cranked bolt that allows it to clear raised frames, rebates, or uneven mounting surfaces.

Manufactured from durable steel, this tower bolt is supplied with a flat keep plate to ensure a secure and positive locking action. It features a classic black finish, making it suitable for both internal and sheltered external applications, such as sheds, outbuildings, and utility doors.

This product is supplied retail-ready, bagged with a header card, making it ideal for both trade displays and easy storage. It is straightforward to install and provides reliable, everyday mechanical security.

Technical Specifications

- **Brand:** Asec
- **Manufacturer Reference:** AS10236
- **Finish:** Black
- **Length:** 15cm (150mm)
- **Width:** 38mm
- **Weight:** 260g
- **Material:** Steel
- **Packaging:** Visi (Bagged with header card)

Key Features

- **Necked Bolt Design:** Offset cranked bolt allows clearance for non-flush door frames, rebates, and uneven surfaces.
- **Durable Steel Construction:** Provides reliable mechanical strength and durability.
- **Flat Keep Plate Included:** Ensures secure bolt engagement and smooth operation.
- **Classic Black Finish:** Blends discreetly with doors and frames while offering protection against wear.
- **Retail-Ready Packaging:** Supplied bagged with a header card, ideal for display and keeping components together.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
