Specification Summary

Brand	Asec
Product type	Lock Out Tag Out

Product Description

The Asec Pneumatic Lockout Hasp is an essential safety device designed to isolate pneumatic hoses and prevent them from being reconnected or used during maintenance and servicing. Manufactured from high-quality, solid stainless steel, this hasp offers exceptional durability and corrosion resistance, making it ideal for demanding industrial environments.

Featuring multiple hole diameters in a single hasp, it is highly versatile and designed to fit most common pneumatic fittings. Once in place, the hasp can be secured with up to two safety padlocks. This ensures the pneumatic line remains safely isolated until maintenance is complete, safeguarding employees from accidental machinery startup or the unexpected release of hazardous energy.

As part of the trusted Asec Lockout Tagout range, this pneumatic lockout hasp helps your business comply with safety procedures and protect your workforce during essential maintenance tasks.

Technical Specifications

- **Brand:** Asec
- **Manufacturer Reference:** AS11850
- **Barcode:** 5015397434302

- **Material:** Stainless Steel
- **Finish:** Stainless Steel
- **Weight:** 75g
- **Pack Quantity:** 1

Key Features

- **Pneumatic Isolation:** Safely isolates pneumatic hoses to prevent reconnection during maintenance.
- **Multi-Hole Design:** Features various hole diameters in one hasp to suit most pneumatic fittings.
- **Dual Lock Capacity:** Can be secured using up to 2 safety padlocks for multi-user lockout.
- **Corrosion Resistant:** Solid stainless steel construction ensures long-lasting durability in harsh environments.
- **Employee Safety:** Helps safeguard workers from unexpected machinery startup or hazardous energy release.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
