Specification Summary

Brand	Asec
Product type	Asec

Product Description

The Asec Proximity Reader is designed specifically to complement the Asec Single Door Access Kit. This compact and reliable reader is operated using 26-bit Wiegand HID, Mifare, and EM credentials, providing a versatile and secure solution for single-door access control.

Engineered for durability, this reader is suitable for external installations, having been fully tested for weather resistance to an IP65 rating. It features a fast card read time of just 120 milliseconds and supports up to 500 users, making it an ideal choice for managing entry to commercial or residential premises. With its slim black plastic housing and built-in visual indication, it offers a discreet yet highly functional addition to your security setup.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
