Specification Summary

Brand	Asec
Product type	Snap Fix

Product Description

The Asec Square Master Keyed (MK) Snap Fit Camlock is a quick and easy-to-install locking solution specifically designed for metal cupboards, lockers, and cabinets. Featuring a square face and a secure 5-pin mechanism, this camlock provides reliable security with the added convenience of master key compatibility (suited to the AS439 master key profile).

Installation is straightforward thanks to the snap-fit design, which secures the lock in place using the supplied spring steel locking plate. The lock operates with a smooth 180° clockwise movement and is supplied complete with two keys. With a high-quality chrome-plated finish, it offers both durability and a clean, professional look for commercial or domestic storage units.

Brand Profile

Asec

ASEC is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
