### Product Description

The Asec Yellow MCB Lockout Type B is a highly visible and straightforward safety device designed to secure miniature circuit breakers during essential maintenance or servicing. This lockout device plays a vital role in Lock Out Tag Out (LOTO) procedures, helping to safeguard employees from the unexpected energisation of machinery or the release of hazardous energy.

Operating the lockout is quick and simple. Once the breaker is switched off, place the lockout device over the switch and turn the integrated thumbscrew. This tightens an internal grub screw securely onto the switch, locking the unit firmly in place. The thumbscrew features an integral hinge, allowing it to fold down flat so that a safety padlock can be fitted through the lockout hasp. Once padlocked, the device cannot be removed or tampered with, ensuring the circuit remains safely isolated.

With its compact 10mm profile and bright yellow finish, this MCB lockout is both easy to deploy and highly visible, making it an essential addition to any workplace safety kit.

## Technical Specifications

- **Brand:** Asec
- **Type:** Type B

- **Profile:** 10mm
- **Finish:** Yellow
- **Weight:** 15g
- **Pack Quantity:** 1
- **Manufacturer Reference:** AS11852
- **Barcode:** 5015397457622

## Key Features

- **Easy to Use:** Simply switch off the breaker, place the lockout over the switch, and tighten the thumbscrew.
- **Secure Locking:** Tightens an internal grub screw onto the switch to lock the unit securely in place.
- **Integral Hinge:** Thumbscrew folds down to allow a padlock to be fitted through the hasp, preventing unauthorised use.
- **High Visibility:** Bright yellow finish ensures the lockout is easily seen, promoting workplace safety.
- **LOTO Compliant:** Helps meet safety practices and procedures to protect employees from unexpected machinery startup or hazardous energy release.

## Brand Profile

Asec

**ASEC** is a **trade-focused security hardware brand** built around the “everyday kit” locksmiths and installers reach for, with a big emphasis on **breadth, availability, and value** rather than boutique-only spec pieces. The brand was **established in 2003** and was created specifically to **support independent retailers and security professionals** with products that *“would never become available through the large multiple retailers.”*

Where ASEC gets especially interesting (and why it tends to become a “default stock brand”) is the **scale of the range**:

- ASEC positions itself as having a portfolio of **2,000+ individual products**, described as one of the **largest ranges under a single security brand name** in the industry.
- Coverage is intentionally broad across the core trade categories: **Access Control, Architectural Hardware, Key Cutting, Locking Products, UPVC, Tools & Accessories**.

ASEC is **exclusive to Aldridge Security** (whom we distribute) in the UK trade ecosystem (Aldridge explicitly calls itself the **exclusive distributor of ASEC Security Products worldwide**). That exclusivity is a big part of the brand’s identity: it keeps the range aimed at the trade channel rather than getting diluted into mass retail.
