## Product Description

The Axim TC-9901 Concealed Transom Closer (Body Only) is a robust and neat overhead door closer designed for concealed installation within the transom bar. This Size 1 closer is a universal model, making it an ideal replacement for older Axim 8800 series, Peters Jackson, Newman Tonks, Ryobi, and other leading transom closers without requiring costly modifications to the door or frame.

Suitable for doors up to 750mm wide and weighing up to 100kg, this unit features fully adjustable latching and closing (sweep) speeds, alongside a mechanical backcheck to cushion the door's opening. The captivated adjustment screws prevent accidental removal during maintenance.

This model is available in both Hold Open (90°) and Non-Hold Open options, with manufacturer references TC-9901-00 and TC-9901-90. Please choose your preferred hold-open functionality, manufacturer reference, and barcode from the options below. It comes complete with fixings, including bearing plates, and comprehensive fitting instructions.

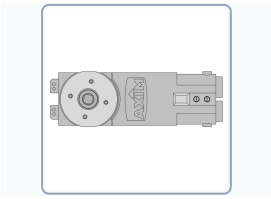

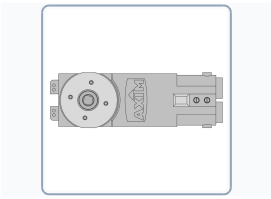

## Technical Specifications

- **Brand:** Axim
- **Application:** Transom
- **Strength Size:** Size 1
- **Maximum Door Width:** 750mm
- **Maximum Door Weight:** 100kg
- **Dimensions:** 29.3cm (Length) x 94mm (Width) x 94mm (Height)

## Brand Profile

Axim

**AXIM (Axim Architectural Hardware)** is a UK-focused architectural door hardware brand best known for its **transom closers / concealed overhead door closers**, plus the broader "commercial aluminium door" hardware ecosystem that goes with them. The brand was **originally formed in 1987** and is built around supplying a **comprehensive, in-stock range** through a **pan-European distributor network**.

AXIM's range is basically "everything you'd spec around a commercial entrance door":

- **Concealed transom closers** (their signature category: TC series like **TC8800, TC9600, TC9900**)
- **Surface mounted overhead closers** (FC series)
- **Floor springs** (FS series)
- Plus the rest of the door-hardware toolbox: **panic exit devices, electric strikes, deadlatches, flush bolts, letter plates, locks, handles**

This is why AXIM shows up a lot in aluminium door setups: it's designed to be a **reliable, spec-friendly "one brand covers most of the door"** option rather than a single hero product.
