Specification Summary

Brand	Axim
Product type	Transom

Product Description

The Axim Transom Door Closer Size 2 (body only) is a neat, sturdy, and concealed door closing solution designed to fit integrally within the transom and door leaf. This concealed design ensures a clean, minimalist aesthetic with no external hardware on display, making it an ideal choice for modern commercial and architectural doors.

This medium-duty closer is suitable for both single and double-action doors with a maximum width of 751mm to 950mm. It features fully adjustable latching and sweep speeds, allowing you to fine-tune the closing action to suit your environment. A fixed cushioned backcheck is also included to prevent damage to the door and surrounding structure by cushioning the opening cycle.

This product is available in multiple options to suit your requirements. You can choose between a Non-Hold Open version (Manufacturer Reference: TC-8802-00, Cover Stamp Code 35) and a Hold Open version (Manufacturer Reference: TC-8802-90, Cover Stamp Code 36). Please select your preferred Hold Open option and corresponding barcode from the options below.

Please note that this is the closer body only, supplied complete with fixings and bearing plates. Associated accessories, such as arms and pivots, are sold separately.

Brand Profile

Axim

AXIM (Axim Architectural Hardware) is a UK-focused architectural door hardware brand best known for its **transom closers / concealed overhead door closers**, plus the broader "commercial aluminium door" hardware ecosystem that goes with them. The brand was **originally formed in 1987** and is built around supplying a **comprehensive, in-stock range** through a **pan-European distributor network**.

AXIM's range is basically "everything you'd spec around a commercial entrance door":

- **Concealed transom closers** (their signature category: TC series like **TC8800, TC9600, TC9900**)
- **Surface mounted overhead closers** (FC series)
- **Floor springs** (FS series)
- Plus the rest of the door-hardware toolbox: **panic exit devices, electric strikes, deadlatches, flush bolts, letter plates, locks, handles**

This is why AXIM shows up a lot in aluminium door setups: it's designed to be a **reliable, spec-friendly "one brand covers most of the door"** option rather than a single hero product.
