Specification Summary

Brand	Baton Lock
Product type	Open Shackle

Product Description

The Baton Lock 6020 Series Open Shackle Brass Padlock offers robust security and durability for a wide range of domestic and commercial applications. Constructed with a solid brass body and finished in a high-quality chrome plating, this padlock is designed to withstand both physical attacks and harsh weather conditions.

At the core of its defence is a virtually pick-proof 5-disc detainer mechanism, providing excellent resistance against lock-picking attempts. For added physical strength, the padlock features a hardened steel shackle and a robust double ball bearing locking mechanism, ensuring the shackle remains securely locked against pulling and twisting forces. For enhanced security, the key is only removable when the padlock is in the locked position, preventing the user from leaving the lock open.

This versatile padlock is available in a range of sizes. Please select your preferred body width, shackle diameter, vertical clearance, and weight from the options below to find the perfect fit for your security requirements.

Technical Specifications

- **Brand:** Baton Lock
- **Body Material:** Solid Brass
- **Body Finish:** Chrome Plated
- **Shackle Material:** Hardened Steel
- **Locking Mechanism:** Double ball bearing
- **Cylinder Mechanism:** 5 Disc Detainer
- **Keying:** Keyed To Differ (2 keys supplied)

Brand Profile

Baton Lock

Baton Lock is a UK-based locking-systems brand and manufacturer focused on **commercial and industrial security hardware**, particularly **cam locks, access-control style locking products, and heavy-duty padlocks**. The company markets itself as an **international manufacturer of locking systems and associated security products**, established in **1973**, with a long-standing reputation for supplying a wide range of locking and access solutions.

They operate out of **Trafford Park, Manchester** (Baton House, Unit 1, Fourth Avenue), and the UK company entity (**BATON LOCK LIMITED**) is listed at Companies House as incorporated in **December 1994**.

What Baton is known for in the trade channel is **disc-detainer / detainer disc** style locking on key product lines (often promoted as highly pick-resistant), plus practical system options like **master-keyed and keyed-alike setups** depending on application. Their product lineup includes:

- **Maxi-security cam locks** (NAMA-style formats, with multiple keyway options)
- **Padlocks** including brass and disc-detainer models, and specialist variants for tougher environments
- Wider “site security bits” you’ll see on distributor shelves (chains, key cabinets, tags), depending on the stockist mix
