Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The BL2005 is one of our entry level models making up the 2000 series range. Fully mechanical and with a simplistic design, this serves as a specialist unit in the standard range. This replaces the standard internal handle with a rim deadbolt, offering a rim fixed alternative. This comes with our specialist, patented ECP coding chamber allowing a quick and easy ‘on the door’ code change.

This lock is designed for applications that is too narrow to contain a regular mortice latch. As a result, the BL2005 comes with a rim fixed deadbolt in replacment for the inside handle, providing an ideal way of securing a thinner gate.

The keypad itself has over 8000 combinations, is cycle tested to 50,000 operations and is suited for light duty, thinner doors.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
