## Product Description

The BL3030 is a range created with space in mind. Offering a smaller keypad compared to the other metal gate locks, this marine-grade, weather-proof lock is retrofit on most available solutions.

Available in both left hand and right handed setups. A adaptor kit is available to suit 140mm fixing centres.

The BL3030 is a range created with space in mind. Offering a smaller keypad compared to the other metal gate locks, this marine-grade, weather-proof lock is retrofit on most available solutions.

The Lock comes with a built in, concealed on the gate code change functionality and is designed for use on metal box gates. This comes with keypads both sides for security in both directions.

This comes as standard to suit 125mm fixing centres. However, an adaptor kit is available to purchase as an additional extra to suit 140mm fixing centres instead.

## Brand Profile

Borg digital locks

**Borg** (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
