Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The BL3030 is a range created with space in mind. Offering a smaller keypad compared to the other metal gate locks, this marine-grade, weather-proof lock is retrofit on most available solutions.

Available in both left hand and right handed setups. A adaptor kit is available to suit 140mm fixing centres.

Combining a specially designed lockcase with a marine grade keypad, the BL3080 ‘Mini’ gate lock series is designedfor metal box section gates. With a reversible push/ pull pad built into the unit, this allows quick exit from the premises.

The BL3080 ‘Mini’ gate lock comes with a concealed ‘on the door’ code change button, allowing quick a quick and easy code change without the need of removing the whole keypad. Simply take of the shield concealing the code change button.

This lock is suitable for 40-60mm gates and comes with two M8 bolt xings. An adaptor plateis available as an additional extra, designed to retro-to 140mm locks. Fully reversible on site and coated in a specialist e-plating for complete external use, it’s designed for harsh conditions and for most styles of metal box section gate.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
