Specification Summary

Brand	Borg digital locks
Product type	Borg digital locks

Product Description

The Borg BL5009 is a medium to heavy-duty mechanical digital lock designed for demanding environments where standard, lighter-duty locks may fail. Featuring a fully clutched round bar lever handle on both the external keypad and the inside unit, this robust lock is ideal for restricting access on timber, composite, aluminium, and steel doors.

A standout feature of the BL5009 is its optional free passage mode. When activated, this function bypasses the coding chamber, allowing users to open the door without entering a code - ideal for busy periods or when unrestricted access is needed. The unit is supplied complete with a 60x72mm mortice nightlatch (60mm backset) for secure, reliable latching.

To protect against vandalism and forced entry, the keypad handle is clutched, preventing damage to the internal mechanism if forced. The round bar handle design also makes this model suitable for DDA-compliant applications.

This lock is available in Satin Chrome (BL5009SC) and Satin Stainless Steel (BL5009SS) finishes. Please select your preferred finish from the options below.

Technical Specifications

- **Manufacturer:** Borg Locks
- **Series:** BL5000 Series
- **Latch Type:** 60x72mm mortice nightlatch (60mm backset)
- **Handle Type:** Round bar lever handle (inside and outside)
- **Door Compatibility:** Timber, composite, aluminium, and steel doors
- **Usage:** Suitable for internal and sheltered external doors
- **Handing:** Non-handed (fully reversible on site)
- **Code Combinations:** Over 2,000 possible combinations

Key Features

- **Medium to Heavy-Duty Build:** Designed to withstand high-traffic commercial and residential environments.
- **Free Passage Mode:** Optional bypass function allows free entry without a code during busy periods.

- **Clutched Handle Protection:** Keypad handle is clutched to prevent damage from forced entry attempts.
- **DDA Compliant Design:** Round bar lever handles make it suitable for Disability Discrimination Act (DDA) applications.
- **Finish Options:** Available in Satin Chrome and Satin Stainless Steel to match your door hardware.

Brand Profile

Borg digital locks

Borg (trading as **Borg Locks**) is a UK access-control brand best known for **mechanical, keyless push-button door and gate locks**: the classic “no batteries, no wiring, just a code” approach that’s popular for shared doors, staff entrances, plant rooms, gates, and anywhere keys inevitably get lost, copied, or ceremonially dropped down a drain.

Borg has been **designing, creating, and distributing mechanical access-control devices since 1997**, with a product line built around different duty levels and environments - from light internal use to heavy-duty commercial traffic.

The range is deliberately broad and application-led: Borg markets keypad locks for **timber doors, steel doors, aluminium doors, gates**, plus specialist lines like **fire-tested keypads** and **marine-grade/weather-resistant** options for exposed installations.

A big “Borg-ism” you’ll see repeatedly is **easy code management -** for example their **Easicode Pro (ECP)** range is designed for **on-the-door code changes** without removing the lock (useful for rentals, staff turnover, site access, etc.).
