Specification Summary

Brand	Borg Accessories
Product type	Borg Accessories

Product Description

The Borg 2000 Series Inside Handle Unit with holdback is a genuine replacement spare part designed specifically for the Borg BL2000 series of mechanical digital locks (excluding the BL2005).

This inside paddle handle features an integrated holdback facility, operated by a simple slide snib on the handle. When engaged, the holdback function allows the latch to remain retracted, keeping the door unlocked for periods of high traffic or when free passage is required. It is ideal for retrofitting to an existing non-holdback lock or replacing a damaged inside handle unit.

Please note: This unit is designed to be used with standard fixings and is compatible with most BL2000 series models (excluding BL2005).

Technical Specifications

- Compatibility: Borg BL2000 series (excluding BL2005)
- Component Type: Inside handle unit
- Function: Holdback (passage mode)
- Operation: Slide snib on handle

Key Features

- Genuine Borg replacement part ensures perfect compatibility and reliable operation
- Integrated holdback facility allows the door to be left unlocked for free passage when required
- Simple slide snib operation to engage or disengage the holdback function
- Ideal for replacing a damaged handle or upgrading a non-holdback unit
