Product type	Borg Accessories

Product Description

The Borg 2000 Series Inside Handle Unit (Non-Holdback) is a genuine replacement internal handle designed for use with Borg BL2000 series mechanical digital locks (excluding the BL2005).

This unit is ideal for replacing a damaged, worn, or broken internal handle, restoring the smooth operation of your digital lock without needing to replace the entire system. Because this is a non-holdback model, it does not feature a holdback snib. This ensures that the door always latches shut automatically when closed, maintaining secure access control at all times.

The handle is fully reversible, making it suitable for installation on both left and right-handed doors, and works seamlessly with standard Borg fixings.

Technical Specifications

- **Brand:** Borg Locks
- **Compatibility:** Borg BL2000 series mechanical digital locks (excluding BL2005)
- **Function:** Non-holdback (no holdback snib)
- **Handing:** Fully reversible (suits left and right-handed doors)
- **Height:** 142mm
- **Width:** 41mm
- **Depth:** 17mm (projection from door face)

Key Features

- **Genuine Replacement Part:** Designed specifically for the Borg BL2000 series to ensure a perfect fit and reliable operation.
- **Non-Holdback Design:** Does not feature a holdback snib, ensuring the door automatically locks and latches upon closing.
- **Fully Reversible:** Can be easily handed on-site to suit both left and right-hand opening doors.
- **Cost-Effective Repair:** Allows you to replace only the worn or damaged internal handle unit instead of the entire lockset.
- **Easy Installation:** Compatible with standard Borg fixings for a straightforward swap.
