Product Description

The Borg 2000 Series XL Fixing Kit is a dedicated accessory designed to extend the installation capabilities of your Borg BL2000 series (also known as the 200 series) mechanical digital locks. While standard Borg digital locks are supplied with fixings suitable for doors up to 60mm thick, this extra-long fixing kit allows you to securely install your lock on much thicker doors of up to 85mm.

Perfect for heavy-duty timber doors, composite doors, or specialised gates, this kit provides the necessary extra-long spindle and matching fixing screws to ensure a robust and reliable installation. By using genuine Borg accessories, you maintain the integrity, smooth operation, and security of your digital keypad lock without having to source non-standard components.

Whether you are installing a new lock on an exceptionally thick door or replacing existing hardware, this XL fixing kit is the ideal solution to ensure a perfect fit.

Technical Specifications

- **Manufacturer:** Borg Accessories
- **Compatibility:** Borg BL2000 series (200 series) digital locks
- **Supported Door Thickness:** Up to 85mm
- **Part Number:** S227
